

Vimdiff cheatsheet

Vim is a very efficient text editor. This reference was made for Vim 8.0.

Navigating

<code>]c</code>	Next difference
<code>[c</code>	Previous difference

Editing

<code>do</code>	Diff Obtain! Pull the changes to the current file.
<code>dp</code>	Diff Put! Push the changes to the other file.
<code>:diffupdate</code>	Re-scan the files for differences.
<code>ZQ</code>	Quit without checking changes

Folds

<code>zo / zO</code>	Open
<code>zc / zC</code>	Close
<code>za / zA</code>	Toggle
<code>zv</code>	Open folds for this line
<code>zM</code>	Close all
<code>zR</code>	Open all
<code>zm</code>	Fold more (foldlevel += 1)
<code>zr</code>	Fold less (foldlevel -= 1)
<code>zx</code>	Update folds
