RE: Attendance letter

Vienna, 21 January 2025

To Whom It May Concern,

This letter is to confirm that Selma Maria Köhler successfully attended the course "Introduction to Computational Meteorology - Exercises" (course number: 262004) offered by me at the University of Vienna during the winter semester 2024. During the course, Selma analyzed state-of-the-art meteorological data using high-performance computing infrastructure to study the potential for photovoltaic energy production.

As part of her coursework, Selma used Python tools such as Xarray, Dask, Matplotlib, and NetCDF. She also worked in a team of three, collaborating with her team to define the specific tasks and goals of the project. She also presented the results in a final presentation.

Throughout the course, I was very impressed by Selma's dedication, her independent and creative thinking, and her contributions to the discussions.

Should you require further confirmation or additional details, please do not hesitate to contact me.

Best regards,

A handwritten signature in black ink, appearing to read 'Aiko Voigt'.

Aiko Voigt
